TVAC40110

Video–combi cable 10m

Save time during installation! This ready–made video–combi cable is a new, extremely practical accessory for the Eyseo camera range. It can be used for the transmission of the video signal and of the power supply. Here the video signal and power supply are not only combined in one cable – the cable is also supplied ready for connection: this spares you the hassle of stripping, connecting and crimping. The video–combi cable is available in a length of 30 m (TVAC40130), 20 m (TVAC40120) and 10 m (TVAC40110).

Product highlights:

- Video signal und power supply combined in one cable
- Ready–made BNC and DC connections
- Suitable for all cameras with BNC jack (female) and voltage connection (male)
- 10m cable length
